

CHAMPS

CHAMPS: Proactive and Positive Classroom Management

Do you want more students to:

- complete their work?
- use class time wisely?
- behave more responsibly?
- be less disruptive?

Do you want to:

- have more confidence in responding to misbehavior?
- know more about increasing motivation?
- know when to use structured rewards (and when not to)?
- spend less time dealing with students behaving irresponsibly?
- improve your ability to motivate students?

CHAMPS will help you address all of the above issues. Learn strategies that will help you clarify your vision of what you want from students, increase classroom organization, directly teach behavioral expectations, increase student motivation, monitor behavior in your classroom, respond consistently and productively to misbehavior, and use class wide strategies to increase student responsibility.

Using the book *CHAMPS: A Proactive and Positive Approach to Classroom Management* (Sprick, Garrison, and Howard, 1998) you will learn to evaluate and adjust (as necessary) your current classroom management plan.
