

## OUR COMMITMENT

Our School will be managed, maintained and operated with the fundamental value that each and everyone of our students, staff, employees and visitors will be safe and secure while attending and visiting our facilities, events or being transported by school transportation.

Our District Risk Management will employ methods, techniques and protocols necessary to control and reduce the various risks present through the school year.

We will set a standard of safety and security for our District that sets an example for our Staff, Employees, Students and Visitors and that will enhance the quality of life for our Community.

We pledge to provide adequate support and budget to this critical area and will provide the necessary long-term commitment to maintaining an effective program through each school year.

Signed
