

The Parachute Case – Participant Handout

Question 1:

Which student will you choose to pack your parachute? Why?

Question 2:

If these were scores in a typical teacher's grade book, which students would pass? Which students would fail?

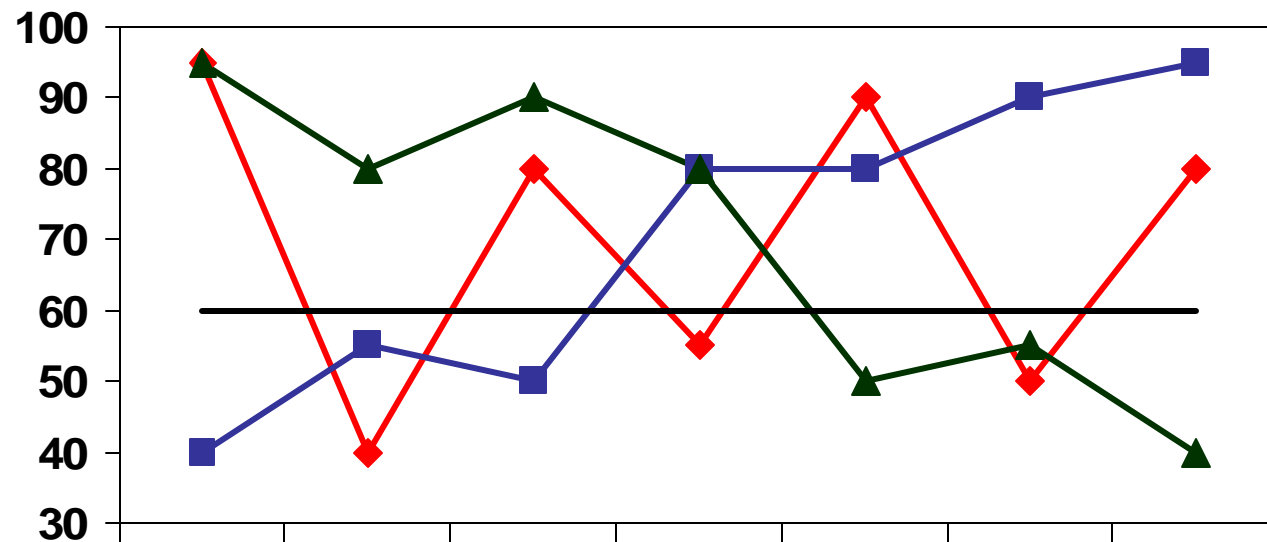

Question 3:

Is there any discrepancy between your answers to questions 1 and 2? If so, why does this discrepancy occur?

Question 4:

What are the implications of this for the way you calculate student grades?

Which student would you choose to pack your parachute?

	1st Try	2nd Try	3rd Try	4th Try	5th Try	6th Try	7th Try
—◆— Student A	95	40	80	55	90	50	80
—■— Student B	40	55	50	80	80	90	95
—▲— Student C	95	80	90	80	50	55	40
— Mastery	60	60	60	60	60	60	60
