

Discover Switch®

For students who need a switch to write.

- **Easy to set up and use.**
- **Complete keyboard and mouse functions in a switch.**
- **Powerful for providing access to any application program.**

Discover:Switch is the easy, all-in-one computer switch for your classroom. It lets students with disabilities use popular reading and writing software, do their homework and learn along with everyone else.

Unlike other access products, Discover:Switch is both a keyboard and mouse for students with disabilities.

Discover:Switch puts full keyboard and mouse functions on the computer screen; the keys on the screen scan and students press Discover:Switch to select the key they want. You can change the Discover:Switch display in many ways to make it look, act and sound just the way you need it for students. The fantastic writing tool for any literacy level.

More than just a mouse-emulating device, Discover:Switch offers pictures, word banks and a full keyboard so students can enter text.

Discover: Switch supports the writing process for students at various literacy levels.

- For students who can't read, Discover:Switch displays pictures for symbolic writing
- For word-bank writers, Discover:Switch offers complete words and phrases for constructing sentences
- For single-letter writers, Discover:Switch is a full keyboard on the computer screen. Students type their words in much the same way as using a regular keyboard
