

Simon Sounds It Out®

Phonics instruction & practice

- Has 31 levels and teachers have option to select the level.
- Tracks progress and records where students stop.
- Prints worksheets.

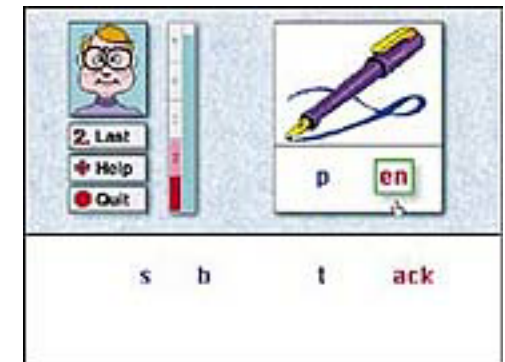

Simon Sounds It Out teaches students phonics and phonological awareness through a friendly, patient on-screen tutor. The tutor instructs students on letter sounds and word families and helps students to use these sounds to construct words. Words are given context through pictures and animations.

The tutor systematically introduces beginning sounds and word families so that students can successfully build increasing numbers of words. Students are guided through five learning activities which include: initial sounds, word families, building complete words, spelling words and reading words.

The tutor tracks student progress and makes instructional decisions to optimize learning and prevent frustration.

Simon Sounds It Out mirrors the way that children learn language.

- Presents real words - not made-up letter combinations
- Displays pictures to help students learn words
- Lets students move at their own pace with individualized phonics lessons
- Reinforces the lesson with print-out worksheets
- Motivates students in a non-threatening way
- Offers positive feedback
- Automatically increases the difficulty level
- Keeps track of individual students' progress
