

Build a Better Mouse House

Parents and Teachers:

You and your child can do this activity together with the [FREE electronic geoboard](#), which you can [download](#) from this page.

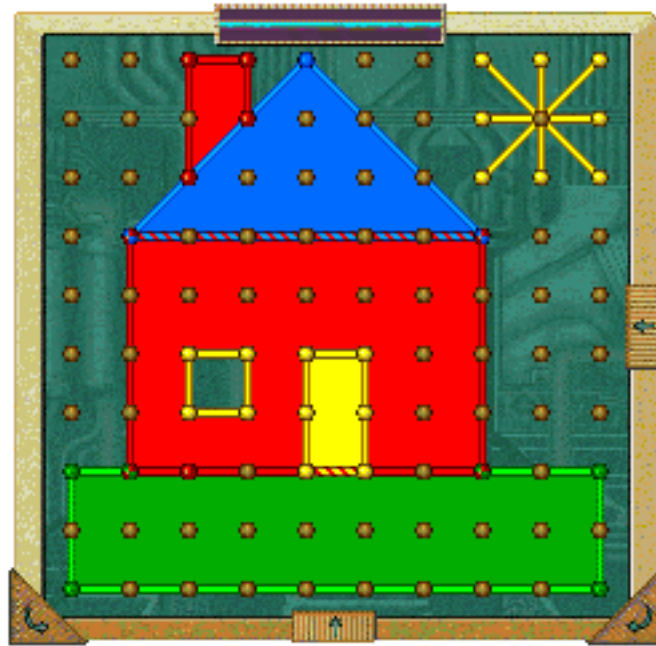

Frank Lloyd Mouse needs a new mouse house!

Help your child build Frank's house by drawing line segments and basic shapes on the electronic geoboard. Encourage your child to name the shapes—circle, triangle, rectangle, square—as they are created, and to compare them ("Which rectangle is bigger?").

Help your child use the Color tool to choose different colors for the line segments. Use the Paint Bucket to color the interior of a shape. The Eraser can be used to erase any line segment. Help your child save the finished house with the Save button. Your child can make as many different houses as he or she wants!

Frank Lloyd Mouse helps children follow blueprints and build with geometric shapes in the Mouse House activity of [Millie's Math House](#), part of Edmark's [Early Learning Series](#).
