

Perimeter to the Max

Parents and Teachers:

Here's an activity to do with the [FREE electronic geoboard](#), which you can [download](#) from this page. Good luck!

Can you make a polygon that has a perimeter greater than 72 units?

Pretty easy, you say?

Well, then, what polygon can you make on the geoboard that has the largest possible perimeter?

Here are some [clues](#) to help you make a polygon with the largest possible perimeter.

Dodeca is a polyhedron on Planet Geometry who helps kids navigate through angular mazes as they solve problems involving angles, polygons, polyhedrons, and more in [Mighty Math Cosmic Geometry](#).
