

# FDLRS Technology Specialists Service Alignment Activities

## Universal Design in Learning

Using digital tools to quickly adapt instructional media and methods to meet individual student needs in a diverse classroom.

## Assistive Technology

Any technology used to increase, maintain, or improve a student's functioning capabilities.

## Accommodations

Allowed changes in instruction and assessment with attention to approved FCAT accommodations.

## Student Achievement

### Technology Service Alignment Activities

FDLRS Associate Center Technology Specialists will work with RLATS and LATS to identify classrooms where teachers would benefit from additional support to insure students who receive assistive technologies and services are successful in the classroom.

FDLRS Techs will make classroom and school visits throughout the year to ensure appropriate technology integration in the instructional setting, through consultations and school wide inservice.

FDLRS Specialized Technology Centers will provide training and resources to support FDLRS Techs in these activities, including training based on network online needs assessments in the areas addressed in the SPP.
