

Document Analysis Forgery Lab

You will be given the signature of a famous person that was recently sold at auction for \$350. Your task is to figure out if the autograph is real or fake. Since the real celebrity is still alive, you will be able to get samples of his/her handwriting to try to make this determination. You must write your findings up on the proper form and use the phrases given in the document training session (see PowerPoint handout).

Make certain you reference construction, shape, fluency, and natural variation in your report. Good luck.

Copy of Questioned Signature
